Languages: JavaScript, Python, Java, C#

Tools: HTML5, CSS, ReactJS, Git, Unity

PROJECTS

Personal Website // JavaScript, ReactJS, CSS

- Developing a personal portfolio that includes info on myself, my hobbies, my projects, etc.
- Used **JavaScript** with the **ReactJS** framework to create components and scripts in SublimeText3
- Implemented **React Bootstrap** and my own **CSS** styling to keep the page responsive

Turret Warfare // C#, Unity

- Developed a 2D top-down, turret-defense game with a military theme using the **Unity Engine**
- Incorporated classes, a physics engine, prefabs, and sprites through **C# scripts**
- Spent time testing and debugging C# scripts and UI elements to assure quality gameplay

Scribble Application // Python

- Developed a robust sketching application using **Python's Tkinter library**
 - Implemented a **Graphical User Interface** with a canvas, radio buttons, sliders, textboxes, etc.
-

AWARDS

Canadian Computing Competition Distinction // Java

Mar. 2019
